Curating the peer review of your articles

A working paper
or a final paper
needing to be
peer reviewed.

upload

www.peerevaluation.org

decide whether your paper
is for private review
or if it is visible to all

Send a private link
to your peers by email
so they can use our
peer reviewing interface.
If your paper is "public",
it gets indexed by Google Scholar.
Also share it in social
media using our built-in
features.

In both cases, your PDF
has now a good looking cover
page, a timestamp and...
an embedded peer review button!
(like in the document
you're viewing right now).
